

PIT PLASTIC T60 CIRCULAR 1200MM HIGH

Product Code: 50303632

PIT PLASTIC T60 CIRCULAR 1200mm HIGH

 MATERIAL
High Density Polyethylene (HDPE)

 SIZE
(L) x (W) x (D)

Features & benefits

Lightweight Design for Faster Installation

The T60 Plastic Pit is lightweight enough for manual handling, eliminating the need for lifting equipment on most installations. This reduces labour costs, speeds up installation and improves on-site safety while making transport and handling significantly easier.

Flexible Circular System

The smooth-walled circular design allows conduits to enter from almost any direction without compromising the pit's structural integrity. Available with compatible collars, lids, risers and split pit options, the T60 system offers maximum flexibility for new installations and upgrades to existing underground networks.

Engineered for Long-Term Performance

Designed and manufactured in Australia, the T60 Plastic Pit meets AS3996:2019 Class B Load Rating and is suitable for pedestrian areas and light traffic. Its durable, UV-resistant construction provides reliable performance in demanding underground infrastructure applications while remaining compatible with Queensland Main Roads MRTS91 specifications.
