Composite

SIZE
615mm (L) x 244mm (W) x 46mm (D)

LOAD RATING
B

Features & benefits

NFC Technology Embedded in every Composite Cover

Designed by Infrastructure Products Australian, the team have smartly provided major communication companies with the ability to GEO Map, track maintenance and record pits, offering increased visibility and protection of network assets.

UV tested, to withstand the harsh Australian elements

Infrastructure Products Australias' composite covers are UV stabilised to ensure they remain robust and slip-resistant even with extended exposure to extreme UV.

Custromisable to suit your brand

We can customise our composite range to suit your brand or application requirements, and we work with major Australian Authorities who do this regularly and have approved our composite covers.

Full specifications

Material	Composite covers are manufactured from a reinforced composite, resulting in a more robust and withstanding product than regular concrete covers. They are also lightweight and exceed specific OH&S standards, making them suitable for a one-person lift.
Australian Standards	Our composite access cover range is designed and built for a Class B load rating, meeting the Australian Standard AS/NZ 3996.
Load Rating	Composite covers are a Class B load rating (ultimate limit state design of 100kN) under the Australian Standard AS/NZ 3996. This makes our composite covers suitable for private and shared residential property and vehicles accessing driveways.
